

Infant June 2024

Summer is finally upon us! It's time for some fun, and that includes lots of water! This month your little ones will have fun from "sea to shining sea," as we have lots of water sensory experiences planned. We'll be learning all about water, oceans, ocean life, and boats and ships during the month!

June is also the month in which we celebrate Father's Day, so we will be learning and talking about fathers!

We have lots in store for a fun summer. We're off to a sensational start!
